

# Dandelion Fingerprint Painting

Create your own dandelion artwork.

## ITEMS NEEDED

- Colored construction paper (yellow, red, orange or light blue will work best)
- Green, white and brown finger paint or non-toxic paint
- Brown marker
- Optional: Tape or glue

## TALLY HO! LET'S HAVE FUN!

1. Choose a piece of colored construction paper to be your background.
2. Dip your finger in the brown paint. Make a brown fingerprint on the construction paper. Make one fingerprint for each dandelion you would like to include in the picture.
3. Dip your finger in green paint. Make a straight line down from the brown fingerprint to form the stem of the dandelion. Add some green around the bottom of your brown fingerprint.
4. Dip your finger in white paint. Make lots of "dandelion wisps" by pressing white fingerprint dots around the brown fingerprint.
5. Once your painting is dry, use the tip of a brown marker to add seeds to your dandelion wisps that are floating.
6. Talk about the parts of the plant including the stem, wisps and seeds.
7. Optional: Tape or glue a different color of construction paper behind your painting to create a frame.
