

Exploring your world, one mission at a time

[Sample PLUM LANDING Explore Outdoors Program Announcement]

Calling All Explorers!

How do your jumping skills compare to a grasshopper's? Where does water flow in your neighborhood? Have you seen a plant growing in an unusual place? How does it survive?

Come and find out with PLUM LANDING!

Plum is an adorable purple alien from the planet Blorb—and the star of the PBS KIDS series PLUM LANDING. She wants YOU to help her explore nature in your city or town so she can report back to her planet!

You'll get outside, get moving, and get exploring the nature that exists around you. Join us for lots of fun, hands-on activities, games, and more ... and learn about your world!

Spending time outdoors can help kids and families feel happier and healthier—and the outdoors is a great place to learn about science. So join us for this program, and explore science in action as you move and have fun!
